

REDUCE COMPLEXITY. REGAIN YOUR EDGE.

Introducing Mobility Edge

As seen in the *10 Key Challenges of Enterprise Mobility*, Honeywell's customer research revealed that our customers need a better, easier way to deploy and manage their mobile solutions.

How have we helped them solve this challenge?

By taking a completely new approach to enterprise mobility.

To Accelerate the Edge, Rethink the Core

After talking to our customers, we completely rethought our approach to the challenges of supporting a mobile workforce. We quickly realized that no new simple technology upgrade was enough. Our customers needed something more comprehensive and dynamic – a mobile platform that is:

- Standardized on Android™**
- Common for all form factors**
- Designed for rapid and easy** app development, testing, provisioning, and deployment management
- Secure, with fast access** to the latest OS security patches or extended support
- Optimized** to drive productivity and efficiency of mobile workers
- Forward-compatible** and future-proof for extended TCO
