

## WHAT IS THE TC8300 TOUCH COMPUTER?

### Revolutionary enterprise-class touch computer—and the ultimate Android platform.

We took the TC8000, the world's most revolutionary enterprise touch computer design and made it better. The TC8300 offers new features that deliver lightning-fast application performance, maximum ease of use, more data capture options, the latest WiFi and Bluetooth technology, more battery power, superior device manageability, government-grade security through FIPS 140-2 and much more. All in the same innovative ergonomic design that provides superior comfort and a 14 percent boost in worker productivity. The TC8300—the revolutionary enterprise touch computer, now with the ultimate Android platform for business.

## WHY SHOULD YOU BUY THE TC8300?

### TOP 5 CUSTOMER BENEFITS

# 1

#### **17 value-add Mobility DNA apps you won't find on any competitive device.**

You get value no other device in this class offers. 17 unique Mobility DNA apps add new functionality, boost productivity, deliver the easiest-ever device management and simplify app development. 13 apps are absolutely free, and 10 are pre-loaded and pre-licensed, ready to use right out of the box. And we add new apps all the time. The result? Undeniable value. Untouchable functionality.

Visit the [Mobility DNA Compatibility Matrix](#) for the most up-to-date list of apps.

# 2

#### **One free hour of worker power.**

The innovative design eliminates the need to constantly tilt the device to verify the scan, simplifying device interaction. And All-touch TE, a pre-loaded and pre-licensed Mobility DNA application, automatically turns “green screens” into all-touch interactive screens that greatly simplify application interaction for faster task completion. The result? A 14% increase in worker productivity—the equivalent of an extra hour a day.

# 3

#### **Never takes time off.**

The TC8300 is always in service, providing value. The battery powers three full shifts without charging. When the power runs low, just hotswap with a fully charged battery for perpetual power. With PowerPrecision Console, a Mobility DNA app, you get extensive battery metrics to easily spot and retire aging batteries, so workers never find themselves without power. And with its ultimate rugged design, you can count on day-in and day-out operation no matter how challenging your environment may be.

# 4

#### **Instant painless migration to Android.**

Worried about the time and cost associated with migrating to Android? Let the TC8300 take it all away. You can run your “green screen” Terminal Emulation (TE) apps right out of the box, without coding or backend modification. Since you can use the same apps you use today, there's no training required and no ‘ramp-up’ time. And when you're ready, with All-touch TE, another Mobility DNA app, you can automatically transform your green screens into elegant interactive screens, quickly and easily.

# 5

#### **Take more time out of your processes with more ways to capture data—and more types of data.**

Choose the 1D/2D scan engine that is optimized for your environment: short, mid or extended range, able to capture barcodes in hand and on the uppermost warehouse racks. Capture even the most challenging direct part marks with a DPM model. You can capture multiple barcodes and entire forms with a single scan with SimulScan. Need photographic proof of condition, service and more? The optional 13 MP color camera makes it easy. And more.

### APPLICATIONS

#### Logistics

- Receiving/putaway
- Inventory management
- Returns processing
- Cross dock operations
- EDI transactions/picking

#### Manufacturing

- Inventory management
- Supply-line replenishment
- Safety testing
- Quality control audits
- Parts track and trace

#### Other Markets

- Retail
- Cold Chain
- Government

### ROI

- Improved staff productivity
- Better customer service
- Minimize migration costs
- Maximum return on investment with future-proof platform
